CERTIFICATES

ITESM, Bachillerato with Honors

HarvardX, *Introduction to Computer Science*

MITx, *6.431x: Probability, the Science of Uncertainty and Data*

MITx, *6.86x: Machine Learning with Python*

KNOWLEDGE AND ABILITIES

JavaScript, TypeScript

React, React Native

Node.js, Python

Lua, C, Processing

Git, MongoDB, SQL

Touch typing (+100 wpm)

LANGUAGES

Spanish

English

French

EXPERIENCE

HopperCat Apps
Programmer | July 2020 - Current

- *App developer for iOS and Android with React Native.*
- *Maintenance for app with over 100,000 users.*
- *Website redesign with React.*

PROJECTS

Codenames Online
React and Node.js

- I made a website to play the famous board-game 'Codenames' online with your friends.
- I used React for the front-end and Node.js for the back-end.
- https://github.com/gabbrousset/codenames

Snek | Snake Game
React Native

- A minimalistic take on the classical Snake game.
- Made with React Native, and published on the App Store and Google Play Store.
- https://github.com/gabbrousset/snake-game-rn

CS50 Finance
Flask, Python, and SQLite3

- Web portal where users can simulate the buying and selling of stocks in real time.
- https://github.com/gabbrousset/CS50-finance

GABRIEL CABALLERO
Software Developer

Snake AI
Python and Pygame

- I taught an AI to play Snake with a pathfinding algorithm.
- The AI is written in Python, and the game and its interface with Pygame.
- https://github.com/gabbrousset/snake-ai

CS50 Mario Bros
Lua and Love

- My version of the game "Mario Bros", made entirely with Lua.
- https://github.com/gabbrousset/CS50-mario

6.86x Digit Recognition
Python and NumPy

- I made an AI that can classify handwritten digits from the MNIST (Mixed National Institute of Standards and Technology) database.
- I created several versions of the AI, each using a different type of neural network.
- Also, I trained some neural networks to be able to recognize two overlapping numbers, from the multi-digit MNIST database.
- https://github.com/gabbrousset/6.86x-digit-recognition
